

Nikolas Rieble

Software Engineer

Email: nikolas@rieble.com

GitHub: github.com/nikolasrieble

PROFILE

Senior software engineer and tech lead with a track record of founding teams, delivering critical projects, and mentoring engineers into leadership roles. Skilled at aligning technical vision with business impact across cloud infrastructure, enterprise platforms, and open-source communities. Combines hands-on architecture and system design with SDLC process building and cross-team coordination.

WORK EXPERIENCE

HashiCorp (Multi-Cloud Infrastructure Automation) Feb. 2024 - Present

- Senior Software Engineer II / Tech Lead Terraform Enterprise
 - High availability: Enabled PostgreSQL failover and cluster support for Terraform Enterprise using Patroni, critical for customer uptime requirements.
 - AdminX team: Founded team and shipped an Admin Console for on-prem admins. Designed token-based access control, established an OpenAPI-first workflow, and handed off leadership to a mentored engineer.
 - SCIM 2.0 delivery: Led delivery of a high-priority project tied to \$60M in account value. Designed nested group modeling beyond the SCIM spec with provisioning limits to prevent performance degradation.
 - Tech lead mentoring: Coached engineers into tech lead roles across two teams, transitioning to shadow leadership focused on architecture review and process guidance.
 - AI & evals: Drove internal AI adoption and built terraform-evals, enabling teams to measure whether AI features and MCP integrations actually improve model performance on Terraform tasks.

Tools: Golang, Ruby, Typescript, Terraform, AWS, GCP, Azure, Kubernetes

Tulip Interfaces (Manufacturing Operations Platform) Jul. 2021 - Jan. 2024

- Engineering Manager / Software Engineer III Analytics
 - Team leadership: Managed a team of 4 engineers to deliver a query and reporting product.
 - Machine learning integration: Architected features for forecasting and anomaly detection.
 - Charting library migration: Replaced Plotly with Recharts, becoming a core maintainer of the library in the process.

Tools: React, TypeScript, Javascript, Meteor.js, MongoDB, Postgres

Scalable Capital (FinTech Investment Platform) Oct. 2019 - Jun. 2021

- Data Engineer BI
 - Data platform: Built ETL pipelines with Airflow and self-service BI tooling with Metabase.

Tools: Python, Airflow, Metabase, Kotlin, Spring Boot, AWS

Hilti GmbH (Global Construction Technology) Aug. 2018 - Sep. 2019

- Fullstack IoT Developer Digital Factory — Data warehousing and reporting for manufacturing IoT.

OPEN SOURCE CONTRIBUTIONS

- Recharts
 - Maintainer: Improved performance, reduced bundle size by 40%, introduced Storybook, and migrated tests to Vitest. Currently an advisory maintainer.

EDUCATION

- M.Sc. Computational Engineering Science Technical University of Berlin, 2015 - 2018
- B.Sc. Psychology University of Vienna, 2013 - 2015
- B.Sc. Mechanical Engineering Technical University Stuttgart, 2009 - 2014
